SUMMARY

Result-oriented B.Tech CSE student specializing in Cybersecurity with hands-on project experience in penetration testing, vulnerability assessment, and secure coding. Skilled in Linux and security frameworks with a strong foundation in risk management and incident response. Seeking a cybersecurity internship to learn, grow professionally, and solve real-world problems in the domain.

EDUCATION

DIT University, Dehradun | August 2023 – May 2027

B.Tech Computer Science with Specialization in Cybersecurity and Privacy

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Cryptography, Network Security

KEY SKILLS

Languages: Java, Python, C, SQL, Bash

Security Tools: Wireshark, Metasploit, Burp Suite

Tools & Technologies: Linux (Ubuntu, Kali), Docker, Git & GitHub, MySQL, VS Code, Jupyter Notebook

Security Domains: Network Security, Penetration Testing, Vulnerability Assessment, Threat Analysis, Cryptography, Incident Response, API Security (Authentication & Authorization flaws, IDOR vulnerabilities, OWASP Top 10 risks)

Interpersonal Skills: Ownership Mindset, Teamwork, Problem Solving, Detail-Oriented, Adaptability

PROJECTS

Reconlens Burp Extension | August 2026

- Designed a Java-based Burp Suite extension using the Burp Extender API to improve web security testing workflows
- Automated request analysis and reconnaissance features to assist in identifying potential attack surfaces during penetration tests
- GitHub: <https://github.com/Coding-with-Mayank/RECONLENS-BURP-EXTENSION>

CredAudit | July 2026

- Designed and implemented a Python security tool for auditing user credentials against configurable security policies
- Leveraged automated analysis to identify weak authentication practices and support secure password management
- GitHub: <https://github.com/Coding-with-Mayank/CredAudit>

Advanced Bug Bounty MCP Server | November 2025

- Created an AI-assisted platform for bug bounty reconnaissance and security research automation
- Supports OWASP/API security workflows and automated asset discovery
- GitHub: <https://github.com/Coding-with-Mayank/advanced-bugbounty-mcp>

Wi-Fi Security Analyzer | September 2025

- Developed a Python-based tool to analyze Wi-Fi networks for weak encryption and security misconfigurations
- Identified vulnerable setups with 90% detection accuracy during testing
- GitHub: <https://github.com/Coding-with-Mayank/wifi-security-analyzer>

CERTIFICATIONS

- Jr Penetration Tester — TryHackMe | August 2026
- Database Management Essentials — University of Colorado (Coursera) | March 2025
- Linux Fundamentals — LearnQuest (Coursera) | March 2025

VOLUNTEERING

Event Coordinator — University Annual Fest | November 2025

- Led the coordination of the University Annual Fest event for the Literature Department, managing 300+ attendees
- Managed event timeline, resource allocation, and resolved real-time operational challenges to ensure successful event completion
