SUMMARY

B.Tech CSE student specializing in Cybersecurity, with hands-on experience in SOC operations, incident response, and vulnerability assessment. Built Python and Java security projects for alert triage, Threat detection, Security assessment, Reconnaissance automation, and Security Monitoring. Seeking opportunities to learn, grow professionally, and solve real-world problems in the domain.

KEY SKILLS

Languages: Java, Pythion, C, SQL, Bash

Security Tools: Nmap**,** Wireshark, Metasploit, Burp Suite

Security Domains: Network Security, Penetration Testing, Vulnerability Assessment, Threat Analysis, Cryptography, Incident Response, Security Monitoring, OWASP Top 10

Tools & Technologies: Linux, Docker, VS Code, MS Word, Excel, and PowerPoint

Interpersonal Skills: Ownership Mindset, Teamwork, Problem Solving, Detail-Oriented, Adaptability

PROFESSIONAL EXPERIENCE

Cybersecurity Analyst Intern – Abreonix Cybersecurity Pvt. Ltd. **July 2026 – October 2026**

- Monitored and triaged SOC alerts, analyzing logs and network traffic to separate genuine threats from false positives
- Supported incident response: investigated events, root-cause analysis, and documented remediation
- Conducted threat analysis and vulnerability assessments, prioritizing findings by risk and severity
- Assisted in preparing security reports, summarizing identified threats, and investigation findings

PROJECTS

Advanced Bug Bounty MCP Server | Github Link **November 2025**

- Developed an AI-assisted bug bounty reconnaissance platform integrating multiple security tools for automated asset discovery and vulnerability scanning.
- Implemented an MCP-based workflow for security analysis, findings prioritization, scope validation, and AI-guided recommendations.

SecuTriage | Github Link **September 2026**

- Developed a Python-based SOC tool to analyze, group, and prioritize security alerts based on risk and severity
- Automated incident scoring, threat detection, and response recommendations to help SOC analysts focus on high-priority threats

Reconlens Burp Extension | Github Link **August 2026**

- Designed a Java-based Burp Suite extension using the Burp Extender API to improve web security testing workflows
- Automated request analysis and reconnaissance features to assist in identifying potential attack surfaces during penetration tests

EDUCATION

DIT University, Dehradun **August 2023 – May 2027**

B.Tech Computer Science with Specialization in Cybersecurity and Privacy

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Cryptography, Network Security, Digital Forensics, Ethical Hacking

CERTIFICATIONS

- SOC Level 1 — **TryHackMe** **Ongoing**
- Jr Penetration Tester — **TryHackMe** **August 2026**
- Database Management Essentials — **University of Colorado (Coursera)** **March 2025**
- Linux Fundamentals — **LearnQuest (Coursera)** **March 2025**

VOLUNTEERING

Event Coordinator — University Annual Fest **November 2025**

- Led the coordination of the University Annual Fest Event for the Literature Department, managing 300+ attendees
- Managed event timeline, resource, and operational challenges to ensure successful event completion
